

# VoIP Phone

## KNZD-63 User Manual

- Please use the external power supply that is included in the package. Other power supplies may cause damage to the phone, affect the behavior or induce noise.
- Before using the external power supply in the package, please check with the power voltage. Inaccurate power voltage may cause fire and damage. Please do not damage the power cord. If power cord or plug is impaired, do not use it, it may cause fire or electric shock.
- The plug-socket combination must be accessible at all times because it serves as the main disconnecting device.
- You are in a situation that could cause bodily injury. Before you work on any equipment, be aware of the hazards involved with electrical circuitry and be familiar with standard practices for preventing accidents.

## **1. Introducing KNZD-63 VoIP Phone**

### **1.1. Thank you for your purchasing KNZD-63 VoIP Phone**

Thank you for your purchasing KNZD-63, KNZD-63 is a rugged telephone that provides voice communication over the same data network that your computer uses.

This phone is designed for use in harsh, dusty, wet and noisy conditions such as mining, subway, tunnel, marine, off-shore, industrial and outdoor sites

This guide will help you easily use the phone.

The phone has two Network ports: The WAN port and the LAN port. Before you connect the power source, please carefully read Safety Notices below

## 2. Initial connecting and Setting

### 2.1. Connect the phone

Step 1: Connect the IP Phone to the corporate IP telephony network. Before you connect the phone to the network, please check if your network can work normally.

You can do this in one of two ways, depending on how your workspace is set up.

Direct network connection—by this method, you need at least one available Ethernet port in your workspace. Use the Ethernet cable in the package to connect WAN port on the back of your phone to the Ethernet port in your workspace. you can make direct network connect. The following two figures are for your reference.

Shared network connection—Use this method if you have a single Ethernet port in your workspace with your desktop computer already connected to it. First, disconnect the Ethernet cable from the computer and attach it to the WAN port on the back of your phone. Next, use the Ethernet cable in the package to connect LAN port on the back of your phone to your desktop computer. Your IP Phone now shares a network connection with your computer. The following figure is for your reference.

## 3. Basic Functions

### 3.1. Basic operation

#### 3.1.1. Accepting a call

- Press the ON/OFF button to accept incoming calls or it will auto-answer. Pls set hotline in advance.

### 3.1.2. Making a call

- Press the ON/OFF button, it will dial out.

### 3.1.3. Ending a call

- Press the ON/OFF button to end calls or it will auto-terminated the calling.

## 4. Operation

### 4.1 Setting via Web Browse

Set the computer and telephone in same LAN network;

When this phone and your PC are connected to network, open the Internet Explorer and then enter the IP address of the WAN port in this phone (e.g. <http://xxx.xxx.xxx.xxx>). (If the log port is not standard port 80, you should input [http://xxx.xxx.xxx.xxx: xxxx/](http://xxx.xxx.xxx.xxx:xxxx/)) See the following web interface.

**User: admin**

**Password: admin**

The screenshot shows a web interface titled "Device Configuration". It contains three input fields: "User:" with the text "admin" entered, "Password:" with six dots representing masked characters, and "Language:" with a dropdown menu showing "English". Below these fields is a "Login" button.

※ if you didn't save the setting, the system would the configuration last time when powered on next time. After changing the parameter, click **【CONFIG】** → **【SAVE】**, the configuration will be saved and take effect soon.

**Before the below steps, please register the phone on your server. The solution **【CONFIG】** → INPUT THE SERVER INFORMATION**

#### 4.2.2.5 Time

NTP Enable: Yes means synchronizing the time automatically via DHCP mode.

1. Configure primary NTP Server Address and server port
2. Configure secondary NTP Server Address and server port
3. Configure Time Zone
4. Interval time for synchronizing with server. Default is 60 seconds.

The screenshot shows the 'Time Settings' page in the KOON Phone web interface. The page has a dark blue header with 'KOON Phone' and navigation tabs for 'Network', 'Phone', 'Speed Dialing', 'Security', 'Time', and 'Language'. A left sidebar contains buttons for 'Status', 'Config', 'Sip Config', 'Security', 'Maintenance', and 'Logout'. The main content area is titled 'Time Settings' and includes the following fields:

- Manually Enter The Time: A date and time input field with a placeholder 'Year/Month/Day---Hour:Minute:Second'.
- NTP Enable: Radio buttons for 'Yes' (selected) and 'No'.
- Primary NTP Server Address: Text input field containing '202.120.2.101'.
- Primary NTP Server Port: Text input field containing '123'.
- Secondary NTP Server Address: Text input field containing 'us.pool.ntp.org'.
- Secondary NTP Server Port: Text input field containing '123'.
- Check Interval: Text input field containing '3600' with a unit 's'.
- Time Zone: A dropdown menu showing 'GMT+8:00 (Beijing, Singapore, Taipei, Hong Kong)'.

A 'Save' button is located at the bottom right of the configuration area.

#### 4.2.2.6 Language

Change the system language in Chinese or English

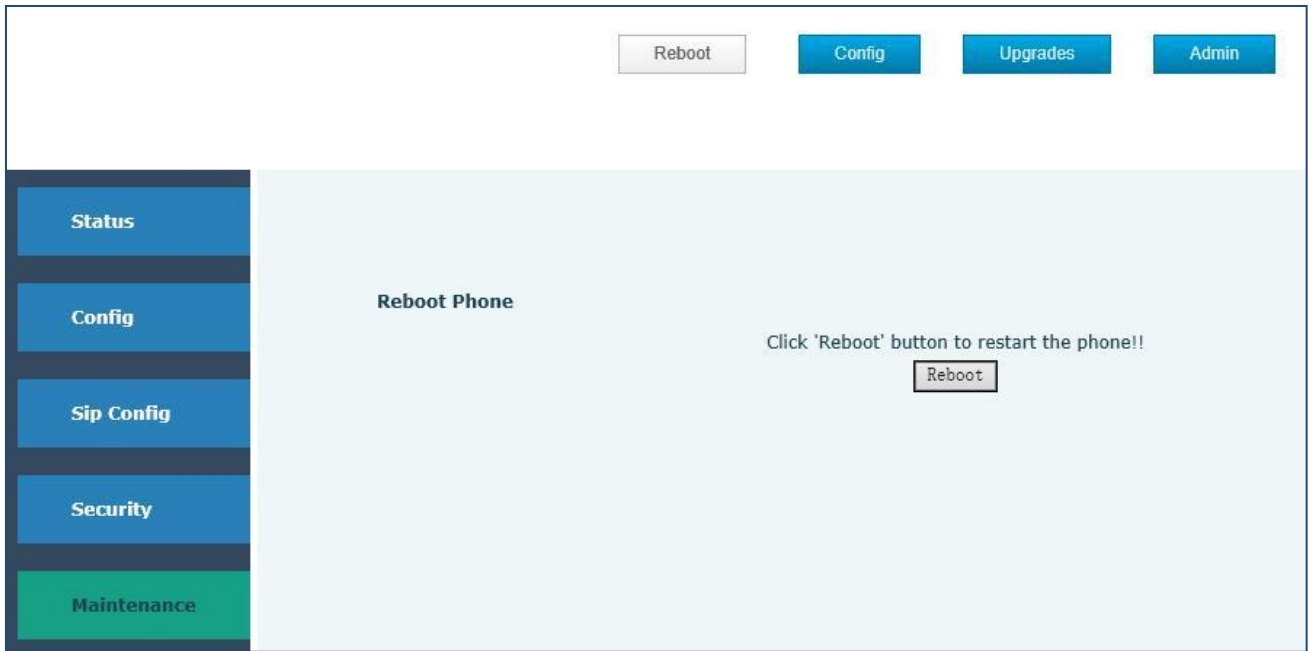

The screenshot shows the 'Language' page in the KOON Phone web interface. The page has a dark blue header with 'KOON Phone' and navigation tabs for 'Network', 'Phone', 'Speed Dialing', 'Security', 'Time', and 'Language'. A left sidebar contains buttons for 'Status', 'Config', 'Sip Config', 'Security', 'Maintenance', and 'Logout'. The main content area is titled 'Language' and includes the following fields:

- Language Selection: A dropdown menu showing 'English'.

A 'Save' button is located at the bottom center of the configuration area.

#### 4.2.5 Maintenance

If the configuration finished, click “the reboot” on the phone to restart the phone.

#### 4.2.6 Logout

Click the Log out button to leave the web operation
